DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-28 drawn to a method in a controlling dispensing access control, classified in class 700, subclass 237.
 - II. Claims 29-41 drawn to a method of billing restaurant customers, classified in class 705.
 - III. Claims 142-53 drawn to a device for distributed remote control of dispensing apparatus, classified in class 700 subclass 242.
 - IV. Claims 54-62 drawn to a dispenser monitoring apparatus, classified in class 700 subclass 244.
2. Inventions I, II, IV, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as securing valuables. See MPEP § 806.05(d). In the instant case, invention II has separate utility such as restocking of inventory. MPEP § 806.05(d). Invention III has separate utility such as controlling remote displays. In the instant case, Invention IV has separate utility such as verifying fault condition or status.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. No claims appear to be linking claims.
